

Do You Know?

Quick -- What's the speed of your fastest computer? ...your slowest?

What Operating Systems are you running? Do you have the latest security patch? ...the latest service patch?

Can your server handle the increased demand of today's resource-hungry applications?

Are you HIPAA and FIPPA compliant?

Sys^{tem}Pro^{file} Knows.

If you don't have the answers to these questions on the tip of your tongue -- they should at least be at your fingertips! We can help.

We've developed a hardware survey system that provides you with ready access to all the information you need to know about your network. It's called **SysPro**.

SysPro will provide you with a detailed report of the current status of your network so your hardware can meet increased demand, give you maximum protection against potential viruses and help you meet the compliance standards of HIPAA and FIPPA.

SysPro surveys your network computers and reports on:

Operating System/Service Pack	Hard Drive (Size and Free)	Monitor
Processor	Optical Drive(s)	Audio
Chipset	Back-up	Partition (Size and Free)
BIOS	IP Address	Network Adapter
System Memory	Modem	Printer(s)
Video Memory	Installed Applications	Power Option(s)
Anti-Virus Software (including days since last definition update)
